Professional Summary

Motivated and detail-oriented Cybersecurity student with a strong foundation in network security, penetration testing, and cryptography. Skilled in web penetration testing with hands-on experience using industry-standard tools such as Burp Suite, OWASP ZAP, and Nmap. Proficient in vulnerability scanning, Linux environments, and network protocol analysis. Currently pursuing a B.Sc. in Cybersecurity and Networks at Cairo University with training in CCNA and Security+. Eager to contribute to real-world cybersecurity projects and continuously improve as an ethical hacker.

Education

B.Sc. in Cybersecurity and Networks

Faculty of Computers and Artificial Intelligence, Cairo University

2023 – 2027 | GPA: 2.88 (Very Good)

Technical Skills

- Programming Languages: Python, C++, Java, JavaScript, PHP, HTML, MySQL, Bash, SQL, Assembly (8085)
- Cybersecurity: Penetration Testing, Web Application Security, Vulnerability Assessment, Cryptography, Hashing, Encryption, Social Engineering Awareness, Malware Analysis
- Tools & Platforms: Linux (Ubuntu/Kali), Wireshark, Nmap, Burp Suite, Metasploit, John the Ripper, Hydra, OWASP ZAP, VirtualBox, VMware, Packet Tracer
- Networking: CCNA, Security+ Basics, TCP/IP, DNS, DHCP, Network Protocol Analysis

Certifications

- CCNA – NTI – 2024
- ECPC – 2024
- Cybersecurity Camp – NTI – 2024
- English Course – NTI – 2024
- IBM Introduction to Cybersecurity – 2025

- IBM Vulnerability Management – 2025
- IBM Governance, Risk, Compliance and Data Privacy – 2025
- IBM System and Network Security – 2025
- IBM Cloud Security – 2025

Projects

- Bit Reversal (8085 Microprocessor): Developed assembly code using loop and rotate instructions to reverse bits.
- LFSR (Java): Created a Linear Feedback Shift Register to simulate pseudo-random bit generation for cryptographic purposes.
- DES Algorithm (Java): Built a custom Data Encryption Standard implementation to deepen understanding of symmetric encryption.
- AES Algorithm (Java): Designed and implemented secure AES encryption and decryption logic for data protection.

Languages

- Arabic: Native
- English: Very Good

Interests

- Ethical Hacking
- Web & Network Penetration Testing
- Capture The Flag (CTF)
- Linux Systems
- Mobile Penetration Testing
- Blockchain Security
